Projects:

Restaurant Website Live-Demo

Created Restaurant Website in this website I have used the React.js , JSX ,CSS , Hooks such as useContext, States, useEffect etc. for the good user Interface(UI). I have added some Dummy Meals data from this data we can add or remove the meals items which is selected for the order . Customer can place order by cart option of order and also they will know the total amount of the order meals.

Expense Tracker App

Developed an expense tracker app in which user can add, delete and update expense Premium feature are also introduced to get dark mode and Download expenses Utilize React.js library for creating this website, Redux for state management, GitHub for version control , Fire Base for storing data and authentication Junior Software developer.
