Projects:

Restaurant Website Live-Demo

➢ Restaurant website user can order the meals from dummy meal list.
➢ User can add or remove the meals items, which is selected for the order.
➢ User see the total price of selected meals.
➢ I have used the React.js, JSX, CSS, React Hooks such as useContext, States, use Effect etc. for the good user Interface (UI).
➢ **Live Demo**
➢ **Github.com**

Expense Tracker App

➢ User can add , edit or delete the expenses as per their requirement .
➢ Premium feature are also introduced to get dark mode and Download expenses.
➢ Utilize React.js library for creating this website, Redux for state management, GitHub for version control, FireBase for storing data and authentication.
➢ **Github.com**

Todo List App

➢ Daily list Task, where user can add their list of task.
➢ After complete the task then user can click on check box and also user can delete or edit task as per required.
➢ **Live Demo**
➢ **Github.com**
